## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 32-33,35-69 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Objections***

Claims 37 and 55 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claims 38 and 44 are objected to because of the following informalities: "the legs" lack proper antecedence (claim 38) and "round" (line 2 of claim 44) should be replaced with "around". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 53-55,58,59,66-68 are rejected under 35 U.S.C. 102(b) as being anticipated by Horn et al. USPN 4888012 ("Horn").

Horn disclose in figures 4-6 an intraocular lens comprising arms 84 and legs 44, collectively forming the outer body of a positioning member surrounding optic lens 12.

Art Unit: 3774

Accommodation is achieved via external forces causing a shape and curvature of the optic to change. The optic may be formed of gel or liquid material.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 32-33,35-52,56-57,60-65,69-72 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horn et al. USPN 4888012 ("Horn") as applied to claims 53-55,58,59,66-68 above and in further view of Hanna USPN 6749634.

Horn is described supra. With respect to claims 32, 44, 47, 48, 51, 52, 56, and 57, Horn is silent as to providing the optic between the planes, an opening anterior to the optic, an opening behind the optic, an annular portion anterior of the optic, and anterior/posterior segments located anteriorly/posteriorly of the optic. Hanna discloses an accommodating lens system for placement in the capsular bag wherein the outer body of the positioning member comprises anterior and posterior segments located anterior and posterior of the optic and comprises openings anterior and posterior of the optic such that the optic is between planes as claimed. The positioning member is shaped to conform to a capsular bag.

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the positioning member of Horn to include anterior and posterior

Art Unit: 3774

segments located anteriorly and posteriorly of the optic as taught in Hanna in order to provide the lens system with a configuration for placement in the capsular bag.

Regarding claims 42,43 and 49, Hanna and Horn are silent as to the dimension along the optical axis and the diopter power of the lens. However, Hanna and Horn are directed to capsular bag implants which are adapted to treat a wide range of patients. Therefore it would have been obvious to one of ordinary skill in the art to select the particular sizes and optical powers in order to fit a particular patients needs. Furthermore, the claimed ranges are well within ranges known in the art and would thus be a matter of obvious design choice.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
